# TEXTIT COIN

Textit Coin: The official digital currency of the independent nation of Texas. First ever DeGov token, anti-CBDC going to \$1 in 2025. Backed by the productivity, goods and services of the 8th largest economy in the world...Texas

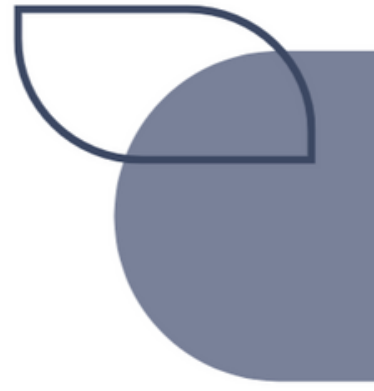

# Vision

Textit Coin (TXIT) is envisioned as the official native currency of the Independent Republic of Texas, with a fixed supply of 100 Billion tokens. Hosted on the highly decentralized Ethereum Network, Textit Coin aims to combat hidden taxation by government central banks like the Federal Reserve, eventually becoming legal tender and the primary medium of exchange for goods and services within an independent Texas.

Concurrently, Textit Coin will serve as the foundation for various decentralized applications (Dapps) and games, aligning with the theme of an independent and self-governing Texas.

# The Movement

The movement to liberate Texas from the United States and its flawed monetary system is gaining momentum. Textit Coin aligns with this movement, aiming to be the official currency of the Independent Republic of Texas when the day of liberation arrives. However, the migration of Texans away from the US Dollar, a tool used to manipulate their economic output, has not been adequately addressed.

# Immediate Future

While the long-term vision involves Textit Coin as the reserve currency of the Republic of Texas, immediate plans include deploying several Dapps using Textit Coin as their native currency.
